

HelioKlischograph K5 Auto

FULLY AUTOMATIC ENGRAVING MACHINE

❖ The HelioKlischograph K5 Auto is an engraving machine for integration into the fully automatic cylinder production AutoCon, the line solution of the Heliograph Group. AutoCon is characterized by a high degree of flexibility and enables simple and seamless expansion of production capacities.

The most important features of fully automatic cylinder production with K5 Auto and AutoCon are:

- Small footprint enables easy integration into existing room structures and sizes.
- Fully automatic cylinder production from copper to chrome in one line.
- State-of-the-art safety concept for maximum system availability.
- Modular concept for easy expansion of production capacities.
- 1-person operating concept (no cylinder adapters).

AutoCon example configurations with K5 Auto

AUTOCON-LINIE ENGRAVING 60

In this configuration, up to 60 cylinders can be engraved fully automatically every day.

AUTOCON-LINIE ENGRAVING CHROME 60

In this configuration, 60 cylinders are engraved and chrome-plated fully automatically every day.

AUTOCON-LINIE COPPER ENGRAVING CHROME 60

In this configuration, up to 60 cylinders can be copper-plated, engraved and chrome-plated fully automatically every day.

Subject to design modifications. Errors excepted.
