

## K500 HelioDisk V 6.10

January 2018

### New functions

- **OHIO Match screens**  
This HelioDisk version includes a set of OHIO-compatible screens. These enable both linework and contone cylinders to be engraved with OHIO compatible screening. Thus cylinders can be mixed between HelioKlischographs and OHIO engravers without any Moiré effect.
- **Engraving time calculation**  
Actual engraving systems like CS, HelioSprint BC+ and HelioXtreme 32+ are fully supported now for engraving time calculation and print-out.
- **Extended job logging**  
The results of the gravure-check can now be part of the engraving certificate. Testcut tolerances will be exported into the .pro file.
- **More simple operation**  
When closing a dialog by simultaneously pressing the CTRL-key the next dialog will be opened automatically.

### Software compatibility

Mac OSX 10.8 / 10.9 / 10.10 / 10.11 / 10.12 / 10.13;
