

K5 MultiControl V 6.0

May 2018

New functions

- **Requires a new dongle!**
K5 HelioKlischographs, delivered before 2018, require a new dongle to run this software!
- **New function "Engraving head change"**
This new function moves the engraving support back, switches the power amplifier off and deactivates the vacuum cleaner. Thus assuring the safe change of the engraving head.
- **Stylus change**
After changing the engraving stylus a correction of the position concerning the distance of stylus / camera can be stored. This function is available when performing a manual testcut.

The previous stylus life-time can be deleted and the actual stylus number can be entered.

Software compatibility

HelioDisk V 6.8.0
HelioCom V 10.0
