K5Smart MultiControl V 7.0
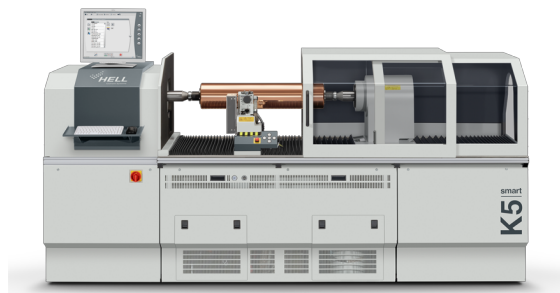

New functions

- **HQH embedded**
  This software contains High Quality Hinting (HQH). HQH improves the legibility / appearance of fine text and graphics. HQH embedded is an option with costs and requires an activation.

- **MultiTune**
  This software supports the new adjustment process for engraving systems MultiTune. MultiTune generates sharper contours as well as less dragging and ringing during engraving. MultiTune is an option with costs and requires an activation.

- **Automatic cylinder measurement**
  The automatic measurement of the cylinder is now only triggered if really necessary.

Software compatibility

HelioDisk V 6.10
HelioCom V 10.0

Based on Innovation.
