

FormProof Packaging V 6.0

February 2015

General

- **Windows 8.0 and Windows 8.1**
This version was adapted to work under Windows 8.0 and 8.1 versions
- **Common, all-in-one installation**
There is now a single, common installation for both FormProof and HQH (however, only the applications activated by the Hasp will be running)

New functionality

- **Enhanced and Updated HP DesignJet Printers Support**

The Support for latest HP DesignJet printers through an updated HP library: printers like T1300, T1500, T2500 and T7100 are now supported and the driving of all printers has been improved.

- **More informative job information** is sent to the printer (to be appeared on the front panel)

- **Improved PDF saving** – It is now possible to save the results as a PDF with the original separations structure and hence to provide significant soft-proof option via Acrobat (in previous version the resultant PDF was CMYK only)

- **Saving the proof result as a file** - The User Interface for saving the results as a file (PDF, Tiff or Jpeg) has been enhanced and simplified

- **View**

The new PViewer 6.0 with enhanced viewing and operations capabilities is included

Bug fixing

- **Saving media by 90 degree rotation** – a job is automatically rotated in case such rotation would help to save media

- **Keeping required scale by 90 degree rotation** – a job is automatically rotated in case the rotation is the only choice to keep the required scaling (like 1:1)

- **Page frame bug** – in some cases, the frame did not appear on the right side of the print, nor at the bottom

Software compatibility

HQH Packaging 6.0

Windows 8.0 and 8.1 - 32 and 64 bit

Windows 7.0 (SP1) - 32 and 64 bit

HelioDisk V 6.0
