

HQH Packaging V 6.0

February 2015

General

- **Windows 8.0 and 8.1**
This version was adapted to work under Windows 8.0 and 8.1 versions
- **Support for higher resolution**
This version can work with higher resolution Tiff files (for example, 400 L/CM).

New functionality

- **“Apply to Solid Text Only” Option**

This option helps HQH in cases of complicated designs, especially where blurred text elements and images are mixed. It helps HQH to concentrate only on the solid text elements in the page and therefore it can simplify the segmentation process and lead to more accurate results.

- **View**

The new PViewer 6.0 with enhanced viewing and operations capabilities is included

Bug fixing

- **Removing Unwanted Artifacts**

Fixes were made for several extreme cases where unwanted artifacts appeared after HQH processing

- **Fix a crash/Link View problem when a job does not start with file #1**

Software compatibility

FormProof Packaging 6.0

Windows 8.0 and 8.1 - 32 and 64 bit

Windows 7.0 (SP1) - 32 and 64 bit

HelioDisk V 6.0
