

### New Features

- **Artpro Format 6.0**  
HelioCom supports Artpro native file format up to version 6.0. These Artpro jobs can directly be opened in HelioCom.
- **New function Testcut Area**  
A testcut area can be defined inside of a cylinder layout. HelioCom saves the coordinates into the job ticket.  
*See illustration*
- **New function Status Folder**  
HelioCom may provide job related status information. The HELL ProductionManager is capable of analyzing this information.  
*See illustration*
- **Further new features**  
See „Final Release Notes“ file.

### Hardware

No additional requirements

### Software

HelioFormproof version 4.2 is needed for proofing a testcut area.
