

### Extensions

- **Mac OS X**  
Version 7 now runs under Mac OS X (native as Carbon application, not in "Classic mode"). In addition this version can still be launched under Mac OS 9.
- **Extended Testcut Layout function**  
The Testcut Layout can now also be defined effortlessly using coordinates.
- **New function: Archiving**  
The "Archiving" function collects together all files associated with the open S&R job and copies them to an output folder.
- **Additional editing functions**  
New criteria for object selection.  
New tool for editing objects (similar to Illustrator).

### Requirements

- **Mac OS 10.2 / Mac OS 9.2**
- **HelioDisk V. 2.33**
