

# Software Information

## HelioCom V 8.6

### New Features

- **Export abort**  
When performing an Export Gravure Jobticket, ArtPro will prompt for a jobticket file for every used separation. It is now possible to abort the export entirely, by clicking the "cancel" button in the file selection dialog, while holding the „alt“-key.
- **PackBits compression**  
Via default setting the compression of high-res TIFF engraving data (higher 600 lpi=236 l/cm) is automatically switched from LZW compression to PackBits compression.
- **Further new features and extensions**  
See Artpro 8.6 „Release Notes“ file

### Software

#### Mac OS X 10.3.9

HelioDisk V. 4.0

K500 V. 2.00, K500Control2 V 2.00

K405 V. 3.21

Compact V. 2.00, TUK V. 2.00
