# HelioControl 3.02

Software information

K406
- **AutoSpacer** support – much shorter setup times thanks to fast format changes
- Enhanced user interface, including extended information in the forms list
- **Setup** via job ticket setup release (POSG/AutoSpacer and testcut/CellGuard) – machine preparation for particularly topical and time-critical productions
- The automatic CellGuard workflow now also supports manual intervention, thus enabling cells to be measured manually with the CellGuard camera, for instance.
- Extended options for flexible engraving channel assignment (head mapping).
- ■

K406 / K405
- Significantly streamlined menu structure at „operator" user level.
- Reorganized „administrator" user level for HelioControl basic settings.
- ■

K405
- Optimized testcut sequence.
- New CellGuard algorithm – for even faster and more reliable results
- New quality control functions - log data of CellGuard results are written back to the job ticket

K406 with CellGuard :
Even with damaged cylinder surfaces, for example, manual measurement with the CellGuard camera can prevent the testcut sequence from being aborted.

Note   **Customized training is strongly recommended** to ensure the safe use and optimum integration of new functions.

Software compatibilities
- Windows2000 compliant - for new (> March 03) delivered HelioControl PC's only
- K406 : GipsyNT V1.39 , HelioForm V2.40
- K405 : HelioDisk V2.32

Order No.
- HelioControl 3.02 **Update**: TOE 0479
