

New Features

- **User defined screens / angles**
A screen editor has been integrated. A user can define his own screens and angles with this editor.
See illustration
- **Improved input of testcut parameter**
Verification of entered testcut parameter (layout and values) has been improved.
- **Display / Print testcut results**
After K405 and K500 perform the automatic testcut the results are stored into the job ticket. These can be displayed and printed by HelioDisk.
- **Extended print options**
Additional job ticket parameter can be printed, e.g. testcut parameter and testcut results.

Hardware

No additional requirements.

Software

- K500 Version V.1.22 is needed to engrave free defined screens / angles.
- K500 V.1.22 or K405 V.2.45 is needed to store testcut results into the job ticket.
