

# Software information

## HelioDisk V 3.04

### New features

- Automatic creation of job tickets**  
 The PC-Version of HelioDisk may automatically create job tickets, without any user interaction at all. As a prerequisite a dedicated parameter file must be provided by a MIS (Management Information System).
- Stylus breakage detection**  
 Default settings for the layout of the stylus breakage detection can be made in the preference dialogue.
- Parameter**  
 Input for cylinder circumference and engraving height can be as accurate as 1/100 mm, before as 1/10 mm.  
 Input for styli angle can be made between 80° and 140°, before between 110° bis 140°.
- Displaying of TIFF engraving data**  
 Displaying of TIFF data performs much faster.
- Bug fixing**  
 Several bugs have been fixed (refer to the software release document).

### Software

#### Mac OS X 10.39

K500 Version V. 1.31; K500Control2 V1.04;  
 K405 Version V. 2.45
