

Software Information

HelioDisk V 4.0

New features

- **Universal Binary**
Starting from this version HelioDisk for Mac comes as „Universal Binary“, i.e. HelioDisk runs in native mode as well on a PowerPC based Apple Computer as on a x86 (Intel) based Apple Computer.
- **New Dongle**
Starting from this version a new dongle (Aladdin HASP) is required as well for the Mac as for the PC version of HelioDisk.
- **Cellaxy**
Jobs for laser direct engraving with Cellaxy can be parametrized by HelioDisk.
- **Ease of use**
On a Mac files can now be opened by “Drag & Drop“ or by „Doubleclick“.
- **Enhanced print function**
The job ticket printout shows more production parameter: cylinder width, cylinder name, ink volume and engraving time for different engraving heads.
- **Further new features and extensions**
See „Release Notes“ file.
