

HelioDisk V 6.2

July 2014

New functions

- **Runs on Mac OS X 10.10 / Yosemite**
- **Testcut tolerances**
From this version on testcut tolerances may be set by HelioDisk. The HelioKlischograph reads the setting from the jobticket ignoring the default setting of the machine.
- **Displaying the runout error**
HelioDisk can display the runout error which the HelioKlischograph stored in the jobticket.
- **Further new features and extensions**
See „Release Notes“ file.
