

## HelioDisk V 6.4

July 2016

### New functions

- **Runs on Mac OS X 10.11 / El Capitan**
- **New engraving heads HelioSprint BC+ and HelioXtreme 32+ are supported.**
- **Testcut tolerances**  
From this version on Helioklischographs may store the default setting of the testcut tolerances, which have been defined at the machine within HelioControl, into the job-ticket..
- **Further new features and extensions**  
See „Release Notes“ file.
