

New features :

- Windows NT4 (SP6) and **Windows 2000** (SP2) tested Version
-
- Support of new HP DesignJet Printer generation : **HP 500** and **HP 800**
-
- Improved User Interface with integrated Remote- and CD-Proof
-
- **Page name title overprint** - with flexible Text color and size adjustment
-
- Support of Microsoft Printer Pool - for **Printer Load Balancing**
-
- Different Trim Lines setting for Publication Hotfolder mode
-
- Improved, faster **HP5000** printing - incl. LUT for 300dpi and 600 dpi
-
- Support of **BookletProof** option
-

**Load Balancing**

The windows operating system allows to assign multiple Printer (models of the same type) to a **Printer-Pool**. This FormProof version supports such a Printer Pool - the output is redirected automatically to the next available Printer.

Hardware

For an optimized printing speed of HP DesignJet 5000
Minimum 250 MB RAM and 800 Mhz Pentium III

Software

No System compatible requirements, but :
This version requires a new dongle (HASP) type !
