

Software Information

K500 Control2 V 1.06

New features

- **Font width controle**
Starting with this version on an enhanced font width controle is supported (requires HelioDisk 3.05).
- **Minimum wall width**
Via default setting a minimum wall width can be set which is used for the automatic wall width controle function.
- **Machine sequences**
Several machine sequences have been accelerated, e.g. loading and unloading of cylinders.
- **Languages**
Polish and Croatian language are supported.
- **Further new extensions**
See „Release_Notes“ file.
