

K500 Control2 V 3.1

May 2010

New functions

- **XtremeEngraving**
Wall width control is performed automatically. (Manual measuring is still possible.)
- **Sequence engraving**
Stylus breakage detection is performed after each partial engraving. (Previously at the end of the final engraving.)
- **K500 in AutoCon Line**
The AutoCon interface was strongly enhanced: For reasons of process optimisation the K500 may report its features on request to the AutoCon control computer, e.g. engraving head type, stylus angle, Twain option. (For interpretation the AutoCon control computer requires an adequate software version.)

Optionally a manual wall width control can be used in remote operation.
- **Enhancements for warming up the engraving head**
Some features have been implemented to enhance the procedure of warming up the engraving head.
- **Bug fixing**
Several bugs have been fixed.
See „Release_Notes“ file.

Software compatibility

HelioDisk V 5.0
HelioCom V 8.6
