

## K500 Control2 V 3.3.4

November 2011

### New functions

- **Testcut and stylus breakage detection**  
Testcut and stylus breakage detection can be engraved inside the same testcut rectangle.
- **Testcut**
  - Improved volume measurement of highlight cells.
  - When changing the stylus the amplifier values are automatically resetted.
  - CellEye can operate now in conjunction with standard engraving heads as well as with older HelioSprint engraving heads.
  - The engraving certificate can show a picture of the wall width control.
- **Full-tone engraving**  
Full-tone engraving can be performed now with different styli angle. The edges left and right are engraved smooth.
- **Run-out measurement**  
The cylinder run-out can be measured starting from this version.
- **Support of the latest HelioSprint engraving heads**
- **Miscellaneous**
  - The description of a user defined screen can be taken out of the jobticket.
  - The GBS can be turned to top position before cylinder unloading.
- **Bug fixing**  
Several bugs have been fixed.  
See „Release\_Notes“ file.
