

New Features

- **Automatic sequence engraving of up to 4 colors**
Starting with this version up to 4 colors can subsequently be engraved in an automatic mode. Colors may be selected from one or several jobs.
See illustration
- **Saving of testcut values in jobticket files**
Measurements of a manual testcut that are entered by an operator are saved now in the jobticket file. Starting with HelioDisk version 2.32 these values can be displayed, documented and archived.
- **Displaying of further jobticket information**
From now on a testcut layout can be displayed on the K500 screen.
- **Optimization of operating sequences**
Several operating sequences as well as machine sequences have been optimized.
- **Bug fixing**
Several bugs have been fixed. (See Read.me file.)

Hardware

No additional requirements.

Software

HelioDisk version 2.32 is needed to display the testcut values.
