

New Features

- **XtremeEngraving**
From this version on XtremeEngraving is supported. XtremeEngraving is an innovative cylinder engraving method which enables the HelioKlischograph to achieve a higher write resolution than the selected screen definition. Now ultrafine resolutions can be combined with high ink applications.
- **Automatic sequence engraving controls up to 8 jobs**
The maximum number of choosable job tickets in one engraving sequence has been increased to 8.
- **Enhanced reliability**
Machine sequences during automated cylinder measurement have been optimized.
- **Bug fixing**
Several bugs have been fixed. (Refer to read.me file on CD)

Hardware requirements

Requirements are not higher.

Software requirements

Using XtremeEngraving requires HelioDisk 3.0, otherwise HelioDisk 2.33.
