

New Features

- **Cylinders with unequal shaft lengths**
This version and later versions enable cylinders with unequal shaft lengths to be engraved.
- **Improved handling for XtremeEngraving**
The slide shoe no longer needs to be adjusted.
- **"Automatic" mode**
New functions have been added to the "Automatic" mode.
- **Additional information on job parameters**
The dialog header of the operator masks contains further information on job parameters (helical, mirroring). Additional information (engraving time, stylus angle) can also be accessed.

Hardware requirements

Requirements are not higher.

Software requirements

Using XtremeEngraving requires HelioDisk 3.0, otherwise HelioDisk 2.33.
